Summar y

I'm a passionate tech explorer who loves diving deep into the ever-evolving world of technology. From building dynamic web applications to now venturing into the fascinating realms of Artificial Intelligence, Data Structures & Algorithms, and Data Science, I'm constantly expanding my skillset. I thrive on solving problems, creating impactful projects, and staying curious. Whether it's coding, tinkering with Robotics & IoT, or learning the next big thing in tech — I'm all in. With hands-on experience in web development and a growing interest in smart, intelligent systems, I aim to merge innovation with functionality to build solutions that matter.

Experience

Aug 2020   Apr 2023

Web Developer
Sindhudurg Sainik School and Junior College, Amboli, Maharashtra

As a Freelance Web Developer for Sindhudurg Sainik School and Junior College, Amboli, Maharashtra 2020 2023 , I was responsible for designing and developing web applications. My role involved implementing innovative solutions, ensuring website functionality, and maintaining web applications. I utilized my skills in web development to deliver projects, meeting the organization's specific requirements.

Certification

Video Editing Cource
I completed the Video Editing Course from Youvah in May 2023, acquiring proficiency in Adobe Premiere Pro. This course, which complements my communication skills, has significantly enhanced my ability to produce engaging video content, strengthening my approach to visual storytelling.

Complete Web Development Cource
I completed the Complete Web Development Course from Udemy in December 2023, enhancing my skills in HTML, CSS, JavaScript, and responsive design. This certification complements my education in computer science and demonstrates my proficiency in building and deploying dynamic web applications.

Skills

- Video Editing
- Full Stack Development
- Communication Skills
- Python
- Problem Solving

Projects

Sindhudurg Sainik School Website

📅 May 2021 - Apr 2023

This is a full stack school website project along with admin panel allowing admin to manage each and every part of website without need to change the code. This ensures great user experience and easy management for client to manage data for the website. This shows my great full stack web development skills along with database management

Personal Financial Tracker

📅 Jun 2025   Jun 2025

This is a modern, responsive financial tracking web application built using the MERN stack with Supabase as the backend. The app allows users to seamlessly manage their income and expenses in real-time with a clean and intuitive UI.

Achievements

Felicitation For Creating the School Website

Achieved recognition for creating the school website, a project focused on enhancing digital communication within the educational institution. This involved skills in web design, content management, and stakeholder collaboration to deliver a user-friendly platform.

Responsibility

Sindhudurg Sainik School and Junior College, Amboli, Maharashtra

Freelance Web Developer

As a Freelance Web Developer at Sindhudurg Sainik School and Junior College, Amboli, Maharashtra, I designed and developed web applications. My responsibilities included front-end and back-end development, ensuring user-friendly interfaces and optimal performance. I utilized coding skills to create and maintain websites.
